

A Magical Muddle Number Potion Game

4 player game

Game Preparation

Before the activity, you will need to print the four 'Number Potion Game Boards'. Print, cut out and laminate the counters and print the cauldron image and the four animal cards. You will also need to print, cut and make the dice net.

Aim

To place all of your magical ingredients into the cauldron to turn into an animal, just like Tabitha and her friends in the Twinkl Original story, 'A Magical Muddle'.

How to play

- Hand each child a Number Potions Game Board and a set of Potion Ingredient Counters.
- The children will need to place their 5 counters, in any order, in the spaces provided next to the numbers.
- The cauldron will need to be placed in the centre of the table and, beside it, place the four animal cards in a pile.
- The first player can roll the dice and say the number they have rolled. They can then find the ingredient card that is next to that number and place it into the magic cauldron.
- Play moves to the next player.
- If a child rolls a number and they have already placed that ingredient counter into the cauldron, they must miss a turn.
- If the dice lands showing the side that says, 'Pick any ingredient', they can select any ingredient counter and place it into the cauldron.
- Once a player has placed all of their counters in the cauldron, they can select the animal that they would like to turn into. You may wish for the child to make that animals sound or act like their animal.
- Continue to play until all of the children have turned into animals.
